

Title: Future cyber-security threats and research needs

Authors: Kreshnik MUSARAJ, Expert in Big Data & Analytics for IT Security, Thales Services SAS

Abstract

In this presentation will be presented and discussed current and future cyber security threats and the reference models of emerging areas of information technology. In addition, the topics will include future cyber-security research activity and obstacles to innovation in cyber-security and privacy. Analysis and conclusions achieved in the Capital project will also be presented.
